Use of Human Volunteers in  
Iodine Skin Permeation Measurements  
Spil-59-69

F. O. Cartan  
MTR-667

In response to your notegram dated October 28, 1969, and pursuant to our several discussions thereafter, it is considered that the draft you submitted re policies and responsibilities, use of human volunteers in iodine skin permeation measurements, is legally adequate, except that it should provide that the responsible supervisor must insure that the voluntary consent form is signed by volunteers prior to participation in the experiments. Also, the policy and responsibility statement should be attached to the voluntary consent form prior to signing by the volunteer.

Original Signed
